# EX-501

Wi-Fi & Touch Exit Switch

Smart Exit Solution Featuring **Wi-Fi and Mobile App** Integration

The EX-501 Wi-Fi & Touch Exit Switch offers a modern, innovative solution for access control systems. Featuring both touch operation and Wi-Fi connectivity, it allows users to open doors using a mobile app, providing convenience and enhanced security in various environments.

Key Feature

Wi-Fi Connectivity:	Open doors remotely using a mobile app, available for both Android and iPhone.
Touch Operation:	Offers easy, touch-based door release in access control systems.
LED Indicators:	Red and green LED lights provide clear status indicators.
Audio Alerts:	Integrated buzzer beep for audible feedback.
Water and Dust Resistance:	IP56 rating ensures durability in different environments.
Smart Design:	High-glass finish with a compact, sleek construction that fits seamlessly into modern architecture.
Remote Access:	Control doors from anywhere in the world using a smartphone and an internet connection.

Remote Access Control
Allows users to open doors remotely via a mobile app from anywhere in the world, making it ideal for high-security areas.

Hands-Free Operation
Provides a touch-free option through smartphone control, enhancing convenience and hygiene in offices, hospitals, and public spaces.
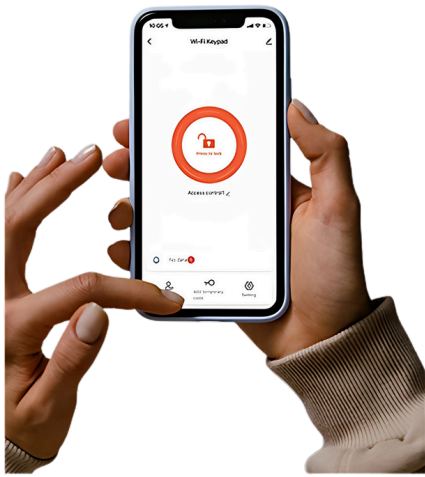

Modern Office Buildings
Integrated into smart office environments, offering employees and visitors convenient access via touch or mobile app.

Commercial Spaces
Suitable for retail stores, hotels, and business centers, where user-friendly, secure access control is required.

Residential Properties
Perfect for apartment buildings, gated communities, and smart home systems, providing residents with enhanced security and easy access.
