

# XG-80DC05

## Wired Shutter Door Contact

## Overview

The XG-80DC05 Shutter Door Contact is specifically designed to secure rolling and shutter doors, offering reliable protection against unauthorized access. Its easy installation on rolling doors allows it to swiftly trigger an alarm, deterring potential intruders and alerting property owners.

The XG-80DC05 is designed to endure harsh environmental conditions with weatherproof materials to prevent rust and corrosion, ensuring long-lasting performance for residential and commercial use.

## Key Feature

Easy Installation:	Simple to install on rolling doors with minimal setup required.
Power Efficiency:	Designed to save power while maintaining reliable performance.
Non-False Alarm:	High accuracy in detection, minimizing the occurrence of false alarms.
Specialized Design:	Specifically designed for rolling doors to prevent unauthorized access.
Wide Application:	Ideal for use on rolling and shutter doors, garages, stores, and more.
Flexible Output:	Available in N.C., N.O., and Changeover configurations to meet different security needs.
Versatile Use:	Ideal for rolling doors, shutter doors, garages, and stores.

### Rolling Door Protection

Effective in detecting illegal movement or opening of rolling doors.

### Shutter Door Security

Provides reliable security for shutter doors in commercial and residential settings.

### Non-False Alarm Assurance

Ensures that alarms are only triggered when necessary, reducing the chances of false alerts.

## Specification

Model Number:	XG-80DC05
Housing:	Metal (Alloy-Zn), Grey
Dimension:	Switch: 88 x 20 x 20 mm
Magnet Dimension:	Magnet: 105 x 47 x 10 mm
Output:	N.C.; N.O. & Changeover available
Easy Installation:	Designed for simple installation on rolling and shutter doors.
Power Efficient:	Power-saving design helps reduce energy consumption.
Non-False Alarm:	Engineered to prevent false alarms.
Application:	Ideal for rolling doors, shutter doors, garages, and stores.
