XG-RL01

Remote Led

Overview

The XG-RL01 is a compact and efficient remote LED indicator designed to provide visual alarm status indication when detectors or alarm devices are activated. Ideal for use in concealed or inaccessible detector installations, this unit ensures that alarm conditions are clearly visible from a remote location.

It operates on DC 24V, with low power consumption (15mA), and is housed in a flame-retardant ABS plastic casing. The compact design makes it easy to install in corridors, junction boxes, or visible wall surfaces where quick alarm status confirmation is needed.

Application

Ideal for use in corridors, false ceilings, electrical rooms, or concealed detector areas, the XG-RL01 provides remote visual indication of detector or alarm activation, improving visibility and system awareness.

Key Feature

Remote Alarm Indication:	Shows status from detectors in hidden or remote areas
Low Power Consumption:	Operates at just 15mA @ DC 24V
Wide Environmental Range:	Reliable in a variety of indoor conditions
Compact & Sleek Design:	Easy to integrate into wall surfaces or junction boxes
Durable ABS Housing:	Flame-retardant material ensures long-term use
Quick Visual Alert:	Bright LED for fast, easy alarm status recognition

Specification

Model Number:	XG-RL01
Operating Voltage:	DC 24V
Operating Temperature:	-10°C ~ +50°C
Operating Humidity:	≤95% RH (non-condensing)
Material:	ABS
Dimensions:	L85 × W85 × H25 mm
