

XAC-110

RFID & Password Standalone Access Control System

Compact and Cost-Effective Access Control Solution

The XAC-110 is a slim, standalone access control system designed for secure and efficient access management. With support for RFID and password access, it combines simplicity and functionality, making it ideal for small businesses, offices, and residential applications.

Key Feature

Compact Design:	Slim profile with a high-gloss finish for a modern look that fits seamlessly in any location.
Standalone Operation:	Functions independently, making it easy to set up for basic access control needs.
High Capacity:	Stores up to 2,000 users, with support for 8 programmable passwords.
Fast Verification:	Processes access requests in less than one second for smooth entry.
Dual Relay Outputs:	Supports door lock and alarm connections for enhanced security.
Simple Management:	User-friendly interface allows for easy enrollment and deletion of users with an administrator password.
Multi-Method Verification:	Offers RFID, password, or a combination for flexible authentication.
Clear Event Notifications:	Built-in LED indicators and buzzer for real-time event feedback.

Small Business Offices

Ideal for cost-effective access management in small office settings.

Residential Buildings

Suitable for apartments or homes requiring secure access control.

Standalone Security

Provides basic standalone access control without complex integration.

Flexible Authentication

Supports RFID, password, or a combination, offering multiple access methods.

Low-Cost Access Control

An affordable and reliable solution for locations with limited access control needs.

Metal waterproof Access Control

RFID Card, Pin, and Multi-users

Strong Waterproof Performance

The machine is fully waterproof and secure, ideal for outdoor use.

Not Afraid Of Dark Environment

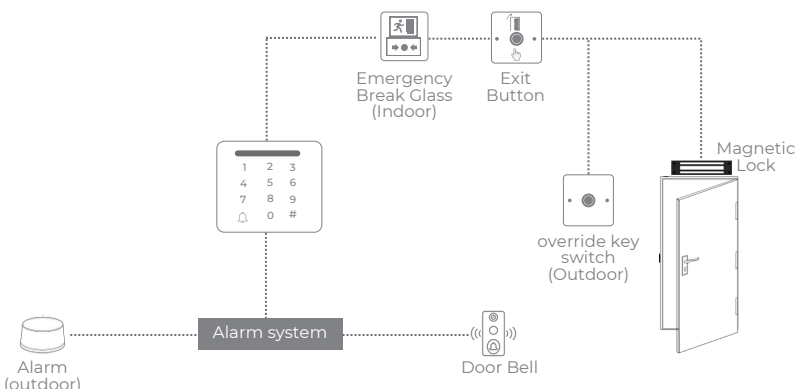

Work Indicator Light + Touch Button Light + Keyboard Indicator Light to protect you in dark environments.

Various Unlocking Methods

- Password to open
- swipe card to open the door
- swipe card + password
